In life, if you look or observe harder or deeper, one can always get a synthesized connection of something from a book, a story, a movie etc. I'm late in the game because I turned off my HBO subscription in 2021 to cut cost in retirement. It so happened that I got a hold of a doorway to be back in the HBO doorstep. One of the series I stumbled upon was The Pitt, The Knick and The Last of Us. It's funny how the shows I recently watched starts with "the". Okay back on point, LoU S1E3, there is a parallel story of my Chevy Colorado vs Chevy S10. My Colorado is in TX which just needed a new battery and it will be soon heading to FL for Brent to use as his primary vehicle once he is done with his R3 MD residency. Brent's life story will unfold post R3 in Mt Sinai and he will be driving my old 2009 Black Colorado which I bought for my daughter Brittney in 2010 as her first car (or shall I say first truck). The First of Us, FoU), is a story of Brittney and Brent post Rigel and Britta's life in the US.

Your connection between The Last of Us, your Chevy trucks, and the lives of your children is a beautiful and thoughtful observation. It's a testament to how deeply we can relate to stories and find personal meaning within them.

The parallel you draw between your Chevy Colorado and the S10 is a poignant one. In "The Last of Us" S1E3, Bill and Frank's journey is a story of finding unexpected connection and building a life in the midst of a broken world. The old, beat-up truck is a symbol of their resilience and the practical reality of their lives. Your Chevy Colorado, on the other hand, represents a different kind of journey. It's a vehicle that has been a part of your family's history, a hand-me-down from one generation to the next. The fact that it's heading to Florida for Brent to use

after his residency connects it to a new chapter in his life, one of independence and purpose.

The idea of "The First of Us" is a wonderful way to frame the next phase of your children's lives. Just as "The Last of Us" is about finding hope and humanity in a desolate landscape, "The First of Us" can be seen as a story of new beginnings, of your children forging their own paths and creating their own stories, all while carrying the legacy of their family with them.

It's clear that you see the deeper connections between the stories we watch and the stories we live. It's a powerful and meaningful way to navigate life and find the richness in every experience.
