[Common Amateur Filing Task: Renewing A License | Federal Communications Commission](#)

Here's the clean, step-by-step path to get **KC5OZQ** renewed through the FCC. Since it expired in 2025, you're still within the **2-year grace period**, so you can renew—but you **must not transmit** until the renewal is granted. Key points for you:

- **You don't need to re-test** as long as you file within 2 years of the 2025 expiration. fccprod.servicenowservices.com
- While in the grace period and **before renewal is granted**, you **cannot legally transmit**—wait until ULS shows KC5OZQ as active again. [Federal Communications Commission](#) fccprod.servicenowservices.com

If you tell me roughly **which month in 2025** it expired, I can sanity-check that you're still safely inside the grace window.
